

UNIFIT® STERILE MEMBRANES AND UNIFIT® DISPENSER

Completely closed system for the sterility testing of pharmaceutical and biopharmaceutical products

UNIFIT STERILE MEMBRANES AND UNIFIT DISPENSER

COMPLETELY CLOSED SYSTEM FOR CRUCIAL STERILITY TESTING OF PHARMACEUTICAL AND BIOPHARMACEUTICAL PRODUCTS

UniFit® membranes are sterile-sealed, gridded membranes. They have no protective paper on the filter which enables easy transfer.

The strip contains 150 sealed membranes. The special pleating of the band units ensures that they are perfectly flat when dispensed. To facilitate traceability, the membrane catalogue number, lot number, pore size and sequential number (from 1 to 150) are printed on the back of every membrane cell.

The UniFit Dispenser is an automated membrane filter dispenser for use with our UniFit continuous sterile membrane filters.

The membrane filters are automatically removed from their sterile package – either in a touch-free mode via an optical sensor or at the touch of a button.

Benefits

- Outstanding recovery rates for microorganisms
- 0.2, 0.45, 0.8µm pore size are available
- Product data are printed on each membrane enables excellent traceability
- Dispenser provides automatic removal of membrane filters from their sterile packaging

ORDERING INFORMATION

FILTER COLOR	PORE SIZE (MM)	CATALOGUE NO.	FILTER DIAMETER	PACKING
White with black grid	0.22	SMFWGMC470022C	47 mm	1 roll/ 150 pcs
White with black grid	0.45	SMFWGMC470045C		
White with black grid	0.8	SMFWGMC470080C
