

Low shock, damped opening and closing
 Differential pressure possible on either side

Proven design, used in large research and industrial systems as well as in space simulation

Series 190 HV gate valve

Series 192 UHV gate valve

Body material

stainless steel

Pneumatic actuator

double acting
 with position indicator
 with solenoid

DN		Ordering numbers (specify control voltage)	
mm	inch	Series 190 HV gate valve ISO-F	Series 192 UHV gate valve ISO-F
400	16	19052-PE44	19252-PE44
500	20	19054-PE44	19254-PE44
630	25	19056-PE44	19256-PE44
800	32	19058-PE44	19258-PE44
900	36	19059-PE44	19259-PE44
1000	40	19060-PE44	19260-PE44
1250	50	19062-PE44	19262-PE44

without position indicator, without solenoid: 19 . . . - . E14

with position indicator, without solenoid: 19 . . . - . E24

Other sizes

on request

Projects for special versions

Our product groups are experienced in developing special requirements concerning material, stability, heaters, etc. On customer request, we can perform special test programs, bakeout and provision of customer specific hand-over quality documentation.

Acceptance tests

are conducted for large special projects, and are prepared by our engineers.

References

Large VAT gate valves have proved their reliability in various large systems all over the world. Reference list available on request.

Sealing materials

Gate: FKM (VITON)

Bonnet: FKM (VITON)

Feedthrough

HV gate valve: shaft feedthrough

UHV gate valve: bellows

Features

Proved VATLOCK configuration (see glossary)

Assembly in cleanroom according to UHV quality standards

DN 900 - 1250 HV with split body: hence extremely short height for dismantling and convenient maintenance (see illustration below)

• Move valve gate to the position «open»

• Unscrew actuator part of body and lift it off from flange part (flange part remains in the system)

• Move valve gate to the position «closed» and carry out maintenance work

Options

Actuator:

- Solenoid for impulse actuation:
 - Power failure: last valve position is maintained
 - Compressed air failure: valve closed - valve remains closed
valve open - valve position is undefined
- Solenoid for impulse actuation and non-return valve:
 - valve position is undefined at power failure and compressed air failure
- Solenoid separate, for external mounting
- Solenoid for 12, 48 VDC
 - 24, 48, 100, 115, 200, 220 V / 50 Hz
 - 24, 100, 115, 200, 220 V / 60 Hz
- Mechanical position indicator (Series 190)
- Lockable actuator

Valve:

- All standard flanges available (ISO, ASA, ASA-LP, JIS)
- Customer specified flanges
- Water-cooled flanges
- Metal static seals
- Ports for roughing (by-pass), venting or for gauges
- Bake-out equipment
- 3-position actuator
- Protective ring
- Heat protection shield
- Other sizes

Ordering information for options:

Ordering No. of valve-X (e. g. 19254-PE44-X,
X = port as per enclosed dimensional drawing)

Accessories

Blank flanges for testing and bake-out

Seal kit

Consisting of seals for bonnet, gate and actuator

Ordering No.: see operating manual
